

# Flow-Lines & Conveyors

Custom solutions

- Efficient flow-lines for fish processing
- Comprehensive solution range
- Processing lines for any application
- Automation available
- Turn-Key solutions

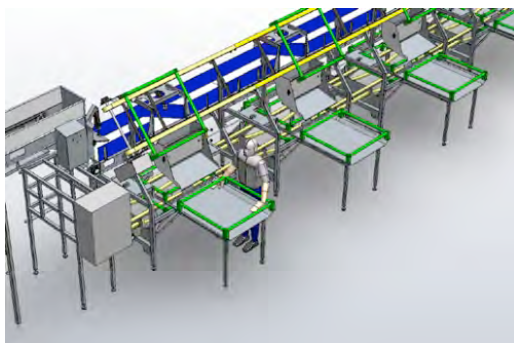

# Advanced Process

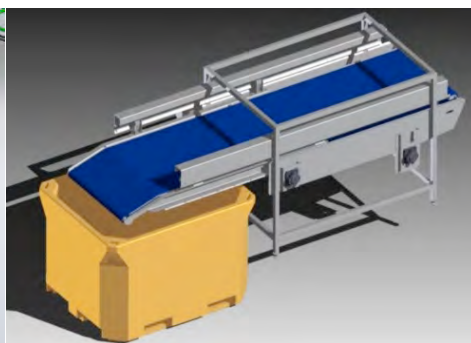

Automatic solutions greatly reduce manual labor

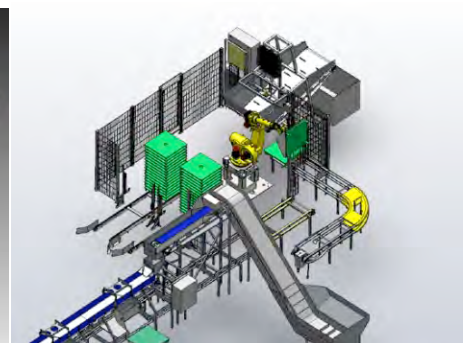

Available is an extensive range of flow-lines with modules addressing each manufacturing state. Years of experience, our solutions are state of the art.

Fish head processing-line

Easy-Layer automatic layer

Robotic solutions

# High Quality Output

## Multiple processing solutions

- 1) Trimming-line
- 2) Trimming & packing-line
- 3) Conveyors
- 4) Glazing machine
- 5) Fillet cooler
- 6) In-feed buffers

### Benefits:

- Complete solutions
- Automatic process
- Scalable capacity
- Considerable labor savings
- Energy efficient flow-lines
- Grader raw material yield
- Customized solutions
- Flexible processing modules
- Easy to cleaning and sterilization

Auto feeding & weighing

Scrub & cleaning line

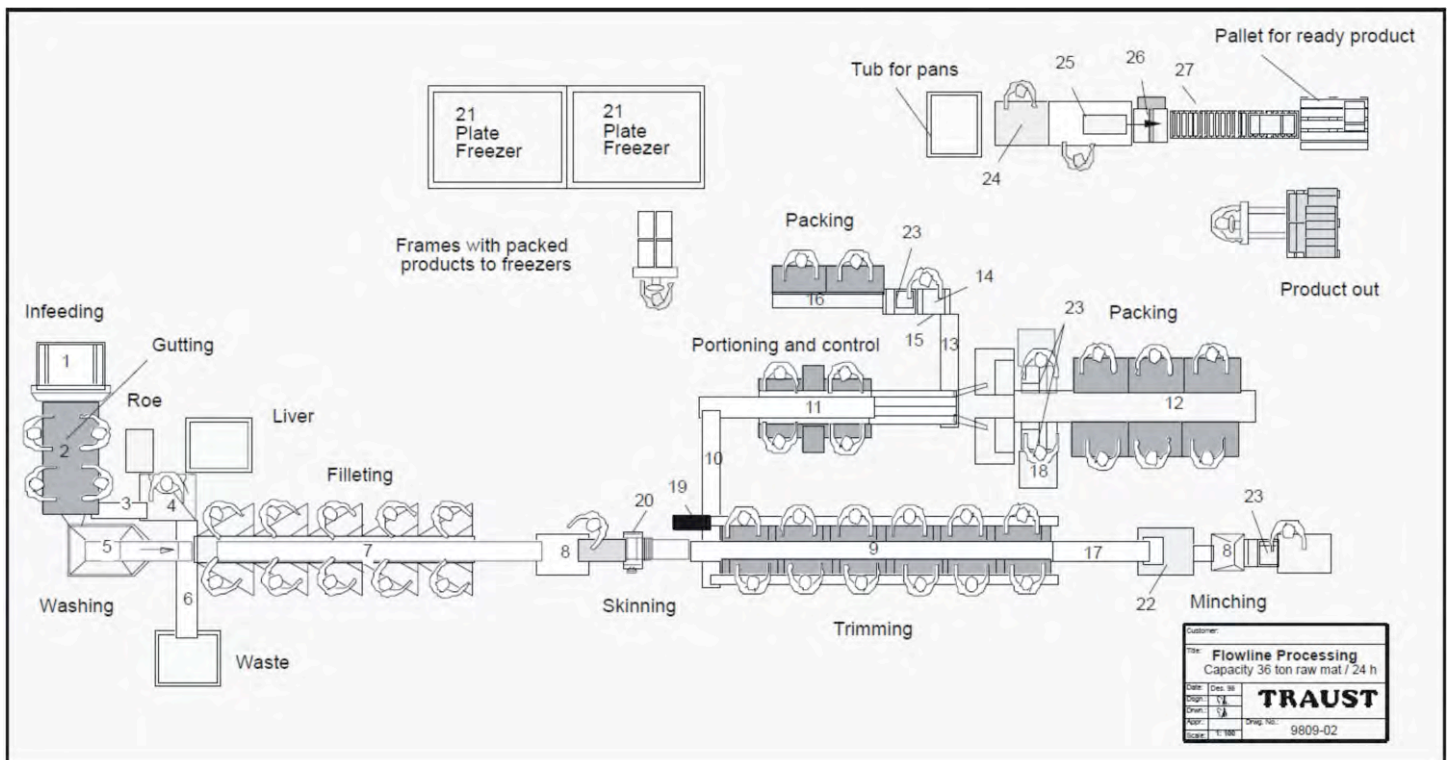

Fillet-line with 6 work stations

# Flow Line Floor Plan

Our engineers design and custom build each application from our extensive range of flow-lines, with modules addressing each manufacturing state. Our solutions are extremely rugged and manufactured with state of the art technology for any food product that needs to be processed on a Flow-Line.

Easy Compact Grader

Easy Weight Batcher

Easy Portioner

## Optimize your investment with custom-made solutions

Traust Know How, Ltd., has been a leader developing fish processing equipment for over 30 years. Our qualified team of engineers with years of experience design and develop all our fish processing plants/equipment to suit the need of the fish processing industry around the world.
