

Easy Brine Mixing System

Advanced on-line brine mixing solutions

- Multi function brine mixing system
- Fast and easy mixing process
- New Back flush system
- Internet connection
- Different receipts at different places

Flexible Solutions

Easy to adapt to your machinery

The multipurpose brine mixing system is designed to have high flexibility and compact design with small footprint. The system is unique because of the many options it can offer, it can be expanded onto basic system.

New Back flush system provide cleaner and higher quality Brine mixture.
We adapt the system to the customers' need. Add-on tanks, control units and delivery stations according to customers' needs.

“TR-850 Injector”

Brine Mixing is essential addition to TR-850 Injector and Easy-Inject “Fish in Fish”.

Tailor - Made Solutions

Standard units with flexibility

This “OnLine” system can be used for all types of salt, both fine salt, sea salt and is automatic mixing and easy to adjust on a touch screen. It takes dry salt from a silo, water and various other components or additives and sends it all into the same pipe and at the delivery end the mixing is ready. With Touch Panel controls, solution strength and mixing time use the control panel to make recipe programming individually to multiple consumers.

Benefits:

- ◆ High Quality and cleaner brine
- ◆ Fast & easy dissolution of the salt
- ◆ Multiple additives mixing at the same time
- ◆ Many pre-stored recipes
- ◆ PC. internet connection
- ◆ Monitoring by internet
- ◆ On-line support
- ◆ The basic system can easily be expanded
- ◆ Accurate ingredients mixing
- ◆ Multiple delivery stations
- ◆ Higher quality product's

“TR-850 Injector”

Brine Mixing is essential addition to TR-850 Injector and Easy-Inject “Fish in Fish”.

Easy Brine Mixing System

Automatic Brine Preparation Easy-Mix Online System.

Mixing of salt and other additives is necessary when using an Injecting Machine. This “OnLine” system can be used for all types of salt, both fine salt, sea salt. It is automatic mixing and easy to adjust on a touch screen. It takes dry salt from a silo, water and other components or additives and transfers the solution into a common transfer line. At the exit gateway the mixture is ready.

With Touch Panel controls, solution strength and mixing time use the control panel to make recipe programming individually to multiple consumers.

There can be several receptions or consumers spread out in the factory. At each delivery place solution with preset strength of the different components can be delivered in preset volume. Each component is measured in milliliters and the solution is uniform.

The multipurpose brine mixing system is designed to have high flexibility and compact design with small footprint. The system is unique because of the many options it can offer, it can be expanded onto basic system.

The computer system keeps track of the different users and delivers the correct mixture and volume, although it is the same basic unit that makes the brine mixture.

The system comes with all necessary fluid containers, pumps, control box, delivery stations and electronic that is needed to install and run the system. Because of it's unique construction, it is very easy to add on units, delivery stations and number of additives and marinates.
